

Easy Dunker / EconoDunker

Maintenance

For both ***Easy Dunkers & EconoDunkers...***

- ◆ Periodically, check tank and frame for any sharp edges.
- ◆ Check seat hinges, bolts and seat spring to be sure that they are solid and secure. Replace if they show signs of wear.
- ◆ Replace any parts that show signs of wear.
- ◆ If you find it necessary to replace a window, be sure to only use an impact resistant polycarbonate. Anything else will burst on impact, resulting in a dangerous situation. **Do not use plexiglass.** Note: We have replacement window kits available.

For ***Easy Dunkers*** (with trailer) only....

- ◆ Check the wiring for the brake lights for any cuts or crimps.
- ◆ Always check brake lights and turns signals, before towing.
- ◆ Check the rope to hold wing frame against tank for wear.
- ◆ Check safety chain and BOTH tongue pins.
- ◆ Replace any parts that show signs of wear.
